CTC Project Update

CTC Committee Members:

These are the updates for the current CTC Projects.

Threlko Project 12-13-161 (Bobwhite Lane EC-23, Lentz Lane EC-131 and Highpoint Road EC-105):

The final walk down of the completed project is scheduled for 12/12/13. A change order was issued for the amount of \$1,480.00 because additional storm water pipe was added to tie in the plunge pool.

Blair Project 12-13-162 (Murrah Forest Drive EC-160 & S19-449, Murrah Forest Court S19-450, Sheppard Drive EC-216 and Silver Fox Court EC-219):

Projects are complete but have not scheduled a final walk down. I'm excepting to schedule walk down by the end of the year. A change order for \$19,800.00 was issued to add asphalt leveling on Murrah Ext and also resurfacing and extending Townes Road at the entrance.

After the holidays Ginny and I will be preparing to do the Mt. Zion Road Project and the Windy Ridge/Country Way Projects which bids will go out in February/March.

The Indefinite Deliver Contract for Engineering Services is due February 7th, 2014. So we will be selecting a group of 5 people to review engineering to do work for us the next 2 years.

SCDOT Update from Clifton (sent 12/09/13):

The resurfacing project on Bland Baptist from SC 23 to S19-237 will be let tomorrow (12/10/13) at 2 pm. The full Depth Reclamation and Triple treatment on Macedonia from US 25 to the End will also be let tomorrow (12/10/13) at 2 pm.

With regards,

Guy Mueller
CTC Administrator

GM/gw
